

Template for 5 x 5 LED Array Construction Jig

Copyright © 2009, Pete Griffiths

- Print this page on to plain paper.
- Check that the printed page is to scale - does this measure 5 inches ?
- Cut around dotted line
- Glue template on to 125mm square of 12mm MDF (5" x 5" x 1/2")
- Drill holes in marked positions

For 5mm LEDs use a 5mm drill
For 3mm LEDs use a 3mm drill

Sorry for mixing mm and inches - it's the electronics industries fault for making thru-hole parts with 0.1" lead pitch and the LED packages in 3mm and 5mm.
